

# Mainpac Connect

**mainpac**  
appreciate your assets

Acknowledging the increasing requirements of organisations today for system “openness” and the need for “best of breed” applications to collaborate with each other; Mainpac has developed a number of interface or “bridging” facilities between Mainpac and an organisation’s in-place enterprise wide (ERP/MRP or FMS) systems.

**Mainpac Connect** provides an interface/porting facility for seamlessly joining the relevant ERP materials, operational and financial management functionality of in-place systems with the appropriate job and plant management functionality of Mainpac.

## Who can “Mainpac Connect” with?

To-date, interface connect facilities have been developed for many ERP/MRP FMS systems including the following:-

- PeopleSoft
- J.D. Edwards
- MFG/PRO
- BPCS
- SAP
- Finance One
- Sun Financials
- Platinum
- AccPac
- MYOB

## What can “Mainpac Connect” to?

The following transaction types can be auto-extracted from the relevant Mainpac tables and process imported into the relevant target system:-

- Purchase Orders and related transactions
- Accounts Payable Invoices and related transactions
- General Ledger Updates (Multiple transaction types)
- HR/Payroll transactions
- Asset System transactions
- MSP- Project system Updates

## What are the benefits of “Mainpac Connect”?

- Eliminates double-handling of maintenance related transactions
- Eliminates lengthy reconciliation processes between systems
- Expands GL reporting and accounting analysis capabilities
- Synchronises in-place ‘best of breed’ systems
- Increases ROI on Mainpac
