

Release Notes

System:	Mainpac v6
Version:	6.82 Patch (build 383)
Release Date:	Friday, 9 March 2007
Contact:	If you have any issues or problems with this release, contact the Mainpac Help Desk on 1800 444 322 or Help@Mainpac.com.au.

Installation Notes

The 6.82 patch is available at; http://www.mainpac.com.au/support_downloads.html.

The 6.82 patch requires Mainpac v6.8 to be already installed.

A v6.8 CD can be requested by completing the online upgrade request form at; http://www.mainpac.com.au/support_upgrade.html

The v6.82 patch updates the client application only. No database structure changes are made.

Change Log

Change Description	Module	Type	Work Done
When reassigning an asset from one group to another, journal records are created to transfer the account balances to the new group, for each component of the asset. These journal records should be effective as at the date last claimed of the component in question. The journal description has the correct date, but the journal date field is incorrectly set to today's date.	Asset Register	Fix	Journal date is now set to the same date as the description, i.e. the date last claimed of the component in question.
When converting a task to a job, the database login prompt may appear. This occurs if the template has an attached document.	Tasks	Fix	No longer have database login prompt
